# **XARPS**

## eXtensible Amateur Radio Payload Specification

Hudson Valley Digital Network 25 May 2020

v0.31

## **Table of Contents**

| XARPS                  | 3 |
|------------------------|---|
| Payload Fields         |   |
| Source and Destination |   |
| Options                |   |
| Data Type              |   |
|                        |   |

## **XARPS**

XARPS stands for eXtensible Amateur Radio Payload Specification. Referencing the Open Systems Interconnection model (OSI model), XARPS is an application layer protocol with link-level awareness for use by RF systems providing application level connectivity to other networked systems. ASCII (UTF-8) is used throughout the specification

## **Payload Fields**

| Source           | Destination      | Options      | Data Type    | Data               |
|------------------|------------------|--------------|--------------|--------------------|
| 9 bytes (string) | 9 bytes (string) | 1 byte (hex) | 1 byte (hex) | 235 bytes (string) |

#### **Source and Destination**

Each contain callsign/handle with SSID. Field size supports IARU decision for 7 character callsigns. Example source and destination data include W1FCC50, PURPLE53.

<u>BEACON99</u> is a reserved word in the <u>destination field</u> for broadcast messages.

## **Options**

| Value       | Option       | Description   |
|-------------|--------------|---|
| 0x00 - 0x05 | Reserved     |   |
| 0x06        | ACK Response | Response to ACK Request   |
| 0x07        | ACK Request  | Used when positive verification is required that a payload was received |

## **Data Type**

| Value       | Туре               | Description                       |
|-------------|--------------------|-----------------------------------|
| 0x00        | Reserved           | Reserved                          |
| 0x01        | Battery            | Battery voltage update            |
| 0x02        | Time               | Current time payload              |
| 0x03        | Position Update    | GPS position update               |
| 0x04        | Weather Update     | Weather station data              |
| 0x05        | Text Message       | Text message between stations     |
| 0x06        | Broadcast          | Broadcast Message to all stations |
| 0x07        | Last Seen Stations | Digest of recent stations         |
| 0x08        | Binary Data        | Binary Data Transfer              |
| 0x09        | APRS               | APRS (encapsulated)               |
| 0x08 - 0x0F | Reserved           | Reserved                          |
| 0x50        | HTTP               | НТТР                              |
| 0x71        | Ident              | Ident                             |

### 0x00 Reserved

Not used

## 0x01 Battery

This payload type provides battery voltage in ASCII numeric format, which may contain a floating point.

## 0x02 Time

This payload contains the time in epoch UTC

## 0x03 Position Update

This message is used to provide position updated formatted as follows:

## [time in UTC],[latitude],[longitude],[altitude],[speed],[direction],[station type]

Station types include:

| Value | Туре                |
|-------|---------------------|
| 0     | Static land station |
| 1     | handheld            |
| 2     | pedestrian          |
| 3     | Civilian vehicle    |
| 4     | Commercial vehicle  |
| 5     | Police vehicle      |
| 6     | Medical vehicle     |
| 7     | fire vehicle        |
| 8     | Federal vehicle     |
| 9     | Command vehicle     |
| 10    | Marina              |
| 11    | Float               |
| 12    | Swimmer             |
| 13    | Civilian Boat       |
| 14    | Commercial Boat     |
| 15    | Police Boat         |
| 16    | Fire Boat           |
| 17    | Coast Guard Boat    |
| 18    | Command Boat        |
| 19    | RESERVED            |
| 20    | Airport             |
| 21    | UAV                 |
| 22    | Experiment Manned   |
| 23    | Civilian Helicopter |

| Value  | Туре                    |
|--------|-------------------------|
| 24     | Civilian Fixed Wing     |
| 25     | Commercial Fixed Wing   |
| 26     | Police Helicopter       |
| 27     | Medical Helicopter      |
| 28     | Federal Helicopter      |
| 29     | RESERVED                |
| 30     | Active Emergency        |
| 31     | Traffic Stop            |
| 32     | Hazard Area             |
| 33-255 | reserved for future use |

## 0x04 Weather Update

Weather updates are still in the definition process, but should utilize METAR format

## 0x05 Text Message

Free text field for text message between stations.

## 0x06 Broadcast Message

Broadcast and beacon messages. While <u>BEACON99</u> is a reserved for any broadcast, it is recommended to <u>BEACON</u> and another <u>SSID</u> if you wish to send specific broadcast types like club bulletins, etc.

### 0x07 Last Seen Stations

Contains a comma delimited list of recently heard stations.

## 0x08 Binary Data

Binary Data Transfer

#### **0x08 APRS**

APRS encapsulated
